

Hamza Béji

About Me

Passionate **Software Engineering student** at the **Faculty of Sciences of Gabès (FSG)** with strong foundations in algorithms, system design, and full-stack development. Enthusiastic about solving complex problems through efficient code and innovative solutions. Currently expanding my expertise in web technologies and mobile development while seeking practical experience to complement my academic knowledge.

Key attributes:

- Solid understanding of OOP principles (Java/C++) and web technologies (HTML/CSS/JS)
- Experience developing academic projects with database integration (MySQL)
- Quick learner with strong analytical and problem-solving skills
- Team player with experience in collaborative coding projects

Skills

Programming Languages

Java, C++, JavaScript, Python

Web Technologies

HTML5, CSS3, JavaScript

Database & Tools

MySQL, Git, System Design, Algorithms

Core Competencies

OOP Principles, Problem Solving, Team Collaboration, Full-Stack Development

Education

Software Engineering

Faculty of Sciences of Gabès (FSG)

Pursuing comprehensive studies in software engineering with a focus on algorithms, system design, and modern development practices. Gaining hands-on experience through academic projects involving database integration and collaborative coding initiatives.
